*Enviro, in partnership with Global ReLeaf International,
will plant a tree for every Enviro Wood or
Pellet Stove purchased.*

Omega Specifications

Area heated*	up to 2500 sq. ft.
Efficiency*	80%
BTU/H input max	60,000
BTU/H input min	16,000
Hopper Capacity **	130 lbs. (with corn) with large lid for easy access.
Weight	455 lbs
Power - normal use/start-up	350 watts/600 watts

Exclusive Features

Automatic electronic controls
Large viewing area (180 sq. in.)
Large (1320 sq. in.) heavy duty heat exchanger
Heat exchanger cleaning system
Easy ash removal with a large, dual-chamber ash pan
Standard bolt-on hearth pad
Standard with ignitor
Tri-mode operating system
 Manual - Hi/Lo - Auto/Off
Remote control or thermostat compatible
Leveling legs
200 cfm variable speed fan
Standard two-tone paint - charcoal/matte black

Dimensions

Unit - 42" High x 26" Deep x 25" Wide

Clearances to Combustibles

Sides 12" - Rear 4" - Top 42"

60,000 BTU's of Heat!

Multi-Fuel Burner -
This system will burn different fuel types without having to change any burner parts -
from wood pellets, corn, wheat, barley, paper pellets to all bark pellets.

Self-Cleaning Burner -
A rod in the burn pot rotates, breaking up any clinker or ash and helps move it into the ash pan. This greatly reduces the cleaning intervals. On high ash fuels like corn, you can run the unit for approx. 130 lbs of fuel or one hopper full before you need to clean the burner. On low ash fuels like good quality wood pellets, the cleaning interval is reduced dramatically. The ash pan would need to be emptied as required.

Tri-mode Control System -
You can operate the Omega in three different modes -
1. Manual Mode
2. Hi/Lo Mode
3. Auto/Off Mode - the unit automatically modulates between hi and low with a time - delayed auto/off function after 30 minutes on low. When the thermostat calls for heat again, the unit will automatically restart.

Sides can be painted to match room décor
